

Joint Linkage to Care, Retention/Reengagement in Care, ART, and Viral Suppression Committee
and Primary Prevention Committee Meeting

Tuesday, September 8, 2020, 11 am – 12 pm Meeting Agenda
Call-in number: 1-888-494-4032; Passcode: 5018896374#

- **Welcome and Roll Call (including pronouns used)**
 - All participants introduced themselves.

- **Finalize 2021 Interventions and Services Guidance recommendations**
 - The committees continued discussion about the I&S Guidance. This year, four components will be recommended for addition to the Guidance as appendices:
 - Safer Services Protocol- This was reviewed at the August Committee Meeting.
 - De-prioritization of HIV Testing for PWID Guidance – This document was reviewed at the meeting, and feedback was given and shared with C. Hicks for consideration. The final draft of the Document will be reviewed in October.
 - Listing of most commonly used interventions – J. Erdman will compose this and share for review in October.
 - The Care Compendium - The Care Compendium Workgroup is very close to completing the document. They are having one final review of the document with J. Maras and the IDPH Care team to ensure that contents are in alignment with programming. The Final Draft will be released to committee members once finalized.
 - At the October committee meeting, all four components will be voted on as a slate as recommendations for inclusion in the I&S Guidance.
 - **Review “one-pager” to accompany training**
 - Because there are no recommendations for new or revised interventions in the I&S Guidance, the committee decided it was not necessary to re-record the 2019 HIP and HIV Prevention I&S Guidance Training. Instead, the 2019 training will be accompanied by a one-page document that explains this decision and the recommended additions described above. The committee reviewed the document and had no comments for revisions.

- **Review Workgroup Activities**
 - **Care Compendium**
 - See note above – After the final draft is complete, W. Bradley will compose and record a Care Compendium Training. All IHIPC members must view the training before the October full body meetings.
 - **Gender Terminology**
 - The Gender Language Workgroup will now be focusing its efforts on gender identity related trainings/education of providers. They are currently working to compile a resource list and plan to develop an additional Gender Language Training.
 - **Health Equity Workgroup**
 - The Health Equity Workgroup had its first meeting in August. Possible objectives for the workgroup were discussed. S. Rehrig and D. Hunt agreed to be workgroup co-chairs.

- **Announcements/Adjourn**
