

## Head/Spinal Cord and Violent Injury (HSVI) Inclusion Criteria

### Head and Spinal Cord 550

Inclusion is determined by a qualifying Diagnosis Code and the final disposition from the ED.

Diagnosed with an injury listed in the Inclusion Injury Diagnosis Code and presented to your facility in the acute phase of injury.

AND

Admitted to your hospital (*inpatient or 23 hr status*) OR arrives at the emergency department and dies before admission to the hospital

### Violent Injury 560

Inclusion can be one of two separate criteria.

Criteria 1 - Inclusion is determined by a qualifying External Cause of Injury Code - Specifically T74 or T76 ICD- 10 Injury Code Range.

AND

The patient is admitted and discharged (*this includes admissions to the Emergency Department*) who have been sexually assaulted or with an injury suspected or alleged to result from domestic violence or child abuse;

Or

Criteria 2 - A qualifying External Cause of Injury Code (*except T74 and T76 which are addressed above*),

AND

All hospital admissions (*inpatient status, ED admission alone does not get included*), including patients admitted for 23-hour observation; patients who are dead on arrival (DOA); patients who discharge themselves against medical advice (AMA).
