Meet Miss Kinley

- Little Miss Kinley was born without a Thymus, leaving her with only 20% of a normal immune system and congenital heart defects.
- Diagnosed with 22q11.2 Deletion Syndrome (DiGeorge Syndrome).
- Now 6 years old, she has had two open heart surgeries and will require more as she grows.
- Could not receive any live vaccines due to low immune system.
- **Kinley depends on EVERYONE to be vaccinated.**

Keeping Kids in School

- Local Health Departments provide a vital link to community partners, providers and schools for ensuring children are vaccinated and are prohibited from attending school.
- During the back-to-school season, Sangamon County Health Department provided vaccines to children:
    - August 6th – 127 children served
    - August 10th – 120 children served
    - August 27th – 80 children served
- The IDPH Vaccines for Children (VFC) program serves children through 18 years of age who meet eligibility criteria. Illinois has over 800 VFC providers.
