Exercise Among Illinois Adults with Disability

Illinois Disability and Health Program Data Brief

June 2016

Physical activity is known to have many health benefits. However, fewer than half of adults in the United States follow recommended activity guidelines. A lower percentage of people with disabilities exercise regularly when compared to people without disabilities, and the rates vary in different parts of the state. This may indicate barriers such as limited availability of accessible exercise areas or lack of accessible transportation. The table below shows the percentage of people with and without disabilities who exercise regularly and the gap, or difference, in those rates. It also shows the percent decrease in exercise rate among people with disabilities. A 100 percent decrease would indicate that the percentage of people with disabilities who exercise regularly is half that of people without disabilities. The counties served by each Center for Independent Living are listed in the table on the following page.

Exercise Participation Rate by Disability Status across Center for Independent Living (CIL) Service Areas: 2010 - 2014

Center for Independent Living	Percentage of Adults Who Exercise				Survey Year
	With Disability	Without Disability	Gap *	Decrease **	
Access Living & Progress Center	63.6%	78.1%	-14.5%	-18.5%	2014
Advocates For Access	54.2%	77.3%	-23.1%	-29.9%	2013
AIM	66.9%	87.6%	-20.7%	-23.6%	2014
IL-IA (IL. only)	56.7%	80.5%	-23.8%	-29.6%	2013
IL Valley	53.7%	78.5%	-24.9%	-31.7%	2013
IMPACT	58.6%	77.8%	-19.2%	-24.7%	2011-2012
Jacksonville Area	--	77.4%	--	--	2012
Lake	70.4%	82.1%	-11.8%	-14.3%	2014
LIFE	61.4%	72.6%	-11.3%	-15.5%	2012-2013
LINC	45.9%	74.0%	-28.1%	-38.0%	2011
Northwestern	63.5%	83.3%	-19.7%	-23.7%	2014
Opportunities for Access	60.1%	76.3%	-16.2%	-21.3%	2011
Options	58.2%	84.8%	-26.7%	-31.4%	2012 & 2014
PACE	71.5%	84.5%	-13.0%	-15.4%	2011-2012
RAMP	57.1%	78.3%	-21.1%	-27.0%	2014
Southern IL	57.9%	81.3%	-23.4%	-28.7%	2010
SAIL	62.3%	83.0%	-20.7%	-24.9%	2011-2012
Springfield	60.3%	80.5%	-20.2%	-25.1%	2011-2012
Stone-Hayes	59.4%	76.6%	-17.2%	-22.4%	2013
West Central	63.5%	77.8%	-14.3%	-18.4%	2012-2013
Will-Grundy	59.8%	86.9%	-27.1%	-31.2%	2014
Southeastern 3 Counties without a CIL	51.0%	77.2%	-26.3%	-34.0%	2010
Southern 6 Counties without a CIL	48.0%	70.5%	-22.4%	-31.9%	2010

* Gap in the rate of persons with and without disability who exercise regularly

** Percentage decrease calculated as follows: exercise prevalence gap divided by exercise prevalence for adults without disability

The combined estimate for the Access Living CIL and the Progress Center CIL is extracted from the 2014 Illinois Behavioral Risk Factor Surveillance System (ILBRFSS). The estimate for persons with disability for the Jacksonville Area CIL was suppressed because it was statistically unstable. The estimate for the Opportunities for Access CIL is based on the following six counties: Clinton, Effingham, Fayette, Marion,

and Washington surveyed in 2011 because the remaining eight counties in the service area were surveyed in 2010 using a different statistical weight.

Data Source: 2010-2014 Round 5 Illinois County Behavioral Risk Factor Surveys (ICBRFS), a random-digit telephone survey of community households conducted by the Illinois Department of Public Health. The survey gathers information on health status and health risk factors among Illinois county residents who are 18 years of age and older. All data analyses are conducted using a statistical weight to produce prevalence estimates across CIL service areas. These prevalence estimates may or may not represent actual exercise prevalence.

Disability Screening: Survey participants who responded positively to either or both of the following questions in the ICBRFS were identified as having a disability: 1) limited in any way in activities because of physical, mental, or emotional problems; 2) have a health problem that requires the use of special equipment, such as a cane, a wheelchair, a special bed, or a special telephone.

Adults Who Exercise: Survey respondents who participated in any exercise during the past 30 days. The percentage of adults who exercise was estimated using a statistical weight for each of the CIL service areas. The statistical weight was primarily based on the probability of each survey respondent being selected in the survey on the basis of sex, age, race, and ethnic origin.

Illinois Centers for Independent Living (CILs) by Service Area (County)

CILs	Service Area (County)
Access Living & Progress Center	Cook
Advocates for Access	Fulton, Peoria, Tazewell, and Woodford
AIM	DuPage, Kane, and Kendall
Illinois-Iowa (IL only)	Henry, Mercer, and Rock Island
Illinois Valley	Bureau, LaSalle, Marshall, Putnam, and Stark
IMPACT	Bond, Calhoun, Greene, Jersey, Macoupin, and Madison
Jacksonville Area	Cass, Mason, Morgan, and Scott
Lake	Lake and McHenry
LIFE	Dewitt, Ford, Livingston, and McLean
LINC	Monroe, Randolph, and St Clair
Northwestern	Carroll, Jo Daviess, Lee, Ogle, and Whiteside
Opportunities for Access	Clay, Clinton, Edwards, Effingham, Fayette, Hamilton, Jasper, Jefferson, Marion, Wabash, Washington, Wayne, and White
Options	Iroquois and Kankakee
PACE	Champaign, Douglas, Edgar, Piatt, and Vermillion
RAMP	Boone, De Kalb, Stephenson, and Winnebago
Southern Illinois	Franklin, Gallatin, Hardin, Jackson, Perry, Saline, and Williamson
SAIL	Clark, Coles, Cumberland, Macon, Moultrie, and Shelby
Springfield	Christian, Logan, Menard, Montgomery, and Sangamon
Stone-Hayes	Henderson, Knox, and Warren
West Central	Adams, Brown, Hancock, McDonough, Pike, and Schuyler
Will-Grundy	Grundy and Will
Southeastern 3 Counties without a CIL	Crawford, Lawrence, and Richland
Southern 6 Counties without a CIL	Alexander, Johnson, Massac, Pope, Pulaski, and Union

This Data Brief is prepared by the Illinois Disability and Health Program, a statewide project initiated jointly by the Illinois Department of Public Health and the University of Illinois at Chicago. The goal of the program is to reduce and prevent chronic health conditions among Illinois citizens with a disability and promote their health, well-being, and quality of life. The Illinois Disability and Health Program represents an effort to include those with a disability in ongoing health promotion and disease prevention activities and to raise public and professional awareness of disability issues to increase access to health care for persons with disability. Funding for this project is provided by the U.S. Centers for Disease Control and Prevention through a cooperative agreement (Grant #: 2NU59DD000938-04). To learn more about the project and how to become involved, contact the program at 217-782-3300, TTY 800-547-0466 (for hearing impaired use only).
