The Illinois Life Care Program

BACKGROUND

In response to growing national concerns regarding the financial stability of facilities offering residency and health care to the elderly, the Illinois General Assembly enacted the *Illinois Life Care Facilities Act* (210 ILCS 40/1 et seq.) in 1982. The act authorizes the Illinois Department of Public Health (IDPH) to regulate residency agreements, referred to as "life care contracts," that require an entrance fee and include personal, nursing or medical care in addition to the residency arrangement.

The Department performs its regulatory function under the provisions of the act and the administrative rules promulgated to implement the act, the *Illinois Life Care Facilities Contract Code* (77 Ill. Adm. Code 396). The act empowers the Department to issue permits allowing facilities to enter into life care contracts, and charges the Department with responsibility for monitoring those facilities for compliance with the act and the code.

The table at the right shows the functions carried out by the Life Care Program to regulate facilities entering into life care contracts, components required for a residency agreement to meet the definition of a life care contract, and the responsibilities that facilities must fulfill to comply with the act and the code.

IDPH Regulates Life Care Facilities By--

- reviewing applications for life care permits
- issuing permits when appropriate
- monitoring facility compliance with the act and the code
- monitoring facility financial statements
- managing the utilization of debt reserve funds of facilities in financial distress

Life Care Contracts Must—

- contain provisions for maintenance services in addition to one of the following: personal, nursing or medical services
- require an entrance fee
- cover a term longer than 12 months
- include a 14 day rescission period

Life Care Facilities Must Comply By-

- obtaining a life care permit
- establishing a debt reserve fund as described by the act
- providing a financial disclosure statement to residents
- providing annual, audited financial statements to the Department

At present, more than 100 facilities in Illinois hold *permits to offer and enter into life care contracts* issued by the Department, and these facilities together represent more than 23,000 living units that can be occupied under such contracts. Beyond meeting the requirements of the act, life care contracts exhibit a variety of terms, conditions and amenities. Life care facilities that do not offer on-site nursing care have agreements with licensed facilities to deliver those services to residents when needed or provide the option of long-term care insurance. Most Illinois facilities with life care permits are located within the greater Chicago metropolitan area.

INSTRUCTIONS FOR COMPLETION OF APPLICATION

This application is for use by all facilities that are required to obtain a *permit to offer and enter into life care contracts* under the provisions of the *Illinois Life Care Facilities Act* (210 ILCS 40/1 et seq.), hereafter "the act." The act requires that any provider who is entering into life care contracts with residents or extending existing contracts obtain a valid permit from the Department. Persons applying for a *permit* should read and refer to the act and the administrative rules promulgated thereunder, the *Illinois Life Care Facilities Contract Code* (77 Illinois Administrative Code 396), hereafter referred to as "the code." Copies of the act and the code are provided along with this form.

Applicants are required to submit an original application and one additional complete copy.

Please ensure that the application contains original signatures. The application and one copy should be sent to
