

Illinois Early Hearing Detection & Intervention (EHDI) Program Data Snapshots

The EHDI Program goals are: screening no later than 1 month of age; diagnosis no later than 3 months of age; and intervention initiated no later than 6 months of age. Meeting these benchmarks improves a child's ability to be on track for social, emotional, educational, developmental, language, and communication targets by kindergarten.

Program Partners:

Illinois Department of Public Health (IDPH)
Illinois Department of Human Services / Early Intervention (IDHS/EI)
UIC-Division of Specialized Care for Children (DSCC)
