

# Campaign to Save Our Moms & Babies Awareness Leads to Action

## Infant Mortality Awareness Month

September

Infant mortality is an infant death during the first year of life. The infant mortality rate is an estimate of the number of infant deaths for every 1,000 live birth.

Resources:  
[www.everthriveil.org](http://www.everthriveil.org)

### INFANT MORTALITY IS A MAJOR INDICATOR OF THE OVERALL HEALTH AND WELL-BEING OF A COMMUNITY

Leading causes of infant mortality

1. Premature and low birth weight
2. Congenital abnormalities
3. SIDS

In 2014, for every 1,000 babies born almost

**7 died**

before they could reach their first birthday.

A black baby born in Illinois is almost

**3 times more likely to die**

than their white counterparts born that same year.

## SIDS/SUID & Perinatal Loss Awareness Month

October

Sudden infant death syndrome (SIDS) is the unexplained death, usually during sleep, of a seemingly healthy baby less than a year old.

Resources:  
[www.sidsillinois.org](http://www.sidsillinois.org)

### FOLLOW THE ABCs OF SAFE SLEEP FOR A BABY: **ALONE, ON BACK, IN A SAFE CRIB IN A SMOKE FREE ENVIRONMENT**

**1 in 5 people**

people know someone who has experienced the death of an infant.

**Black infants are almost 4 times as likely to die from SUID**

as white infants

Bed-sharing with baby can increase the risk of death within the **first 3 months by as much as 5 times**

even if no other risk factors present.

## Prematurity Awareness Month

November

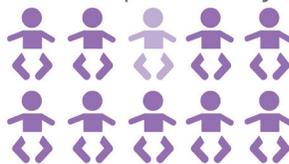

Premature birth is when a baby is born at fewer than 37 completed weeks gestation.

### SOLVING THE COMPLEX PROBLEM OF PREMATURE BIRTH

**1 in 10 babies** is born prematurely

Premature birth is the

**#1 cause of death** in newborns

Premature birth is a leading cause of

**lasting childhood disabilities,**

such as learning, vision and lung problems
