

CHLAMYDIA IS THE MOST COMMONLY REPORTED DISEASE IN ILLINOIS

Every year there are around 65,000 cases of chlamydia in Illinois. Chlamydia is transmitted through unprotected anal, oral and vaginal sex. Untreated chlamydia infections can lead to complications like pelvic inflammatory disease (PID), ectopic pregnancies and infertility. Women are at a greater risk than men of getting a chlamydia infection.

Who has chlamydia?

7 of 10 cases are in women
